

CLIKSEAL™ CONTAINERS

FOR PNEUMATIC TUBE SYSTEMS

- ClikSeal™ Containers are leak-resistant and ideal for pneumatic tube systems. The safety 'click' you hear when you tighten the lid assures you that the cap is sealed and ready for transport. The 90 cc containers are graduated in ¼ oz. increments from ½ to 3 oz. and also in 10 cc increments from 20 cc to 90 cc. The 120 cc containers are graduated in ¼ oz. increments from ¼ to 4 oz. and also in 10 cc increments from 20 cc to 120 cc. All ClikSeal™ containers have a blue screw-on cap.

All ClikSeal™ Leak-Resistant Containers have:

- a unique inner-cap thread design to ensure leak-resistance when the cap is properly tightened
- polypropylene containers, allowing for quick visualization
- polyethylene lid, ensuring a tight seal for maximum leak-resistance
- slightly raised grooves on both the lid and the base for stability while gripping the container
- a lid designed to enable stacking of multiple containers
- a sterility-seal and patient i.d. label affixed to the container with lines for number, name & doctor (*on sterile containers only*)

Product	Description	Capacity	Case Pack	Sterile	Material	Packaging
02057	ClikSeal™ Specimen Container	3 oz. / 90 cc	400	No	PP / PE	Bulk
02058	ClikSeal™ Specimen Container	4 oz. / 120 cc	300	No	PP / PE	Bulk
01064	ClikSeal™ Specimen Container	3 oz. / 90 cc	400	Yes*	PP / PE	Bulk (4 Bags of 100 Each)
01063	ClikSeal™ Specimen Container	4 oz. / 120 cc	300	Yes*	PP / PE	Bulk (3 Bags of 100 Each)
01062	ClikSeal™ Specimen Container	3 oz. / 90 cc	100	Yes	PP / PE	O.R. Peel Pouch
01061	ClikSeal™ Specimen Container	4 oz. / 120 cc	100	Yes	PP / PE	O.R. Peel Pouch

* Only inner surfaces are guaranteed sterile

PP = Polypropylene (Container) PE = Polyethylene (Lid)
